

10K Square Tube Trailer Jacks

STRONG & RELIABLE
RAM®

"The Best Overall Value In The Industry"

Ideal for use with ag, industrial, commercial, medium to larger utility trailers.

10,000lbs support capacity / 8,000lbs lift capacity

Robust 3.15" outer tube construction with a durable black exterior grade finish

Inner tube/drop leg assembly durable black exterior grade finish

Topwind model has a grease zerk and sidewind model has two grease zerks for easy greasing of jack

6"x7.5" welded on durable sand foot

15" travel distance and the drop leg adds 13.5" of adjustability

Topwind version has a comfortable claw knob, heavy duty steel block assembly and clear zinc solid bar handle that can be folded away when not in use

Sidewind version has a 3/4" hex head for electric drill operation at slow speed and a removeable handle with grooved comfort grip for manual operation

TJD-10000TW-B topwind jack 25" retracted height

TJD-10000S-B sidewind jack 26.5" retracted height

Great option when an 8K support jack is too light and a 12K support jack is too much for a specific application
